

## Junior System Engineer – software integration

Metrological is quickly growing (inter-)nationally and therefore we are looking for expansion of our current team with a System Integration Engineer who will be based on customer premises in Istanbul Turkey (temporary position - 6 months)

### What will you do?

You will be responsible for supporting the integration, validation and deployment of the Metrological TV Application Framework on our client's setup boxes.

You will be part of our development/operations team (which includes 40 dedicated team members: Frontend Developers, Backend Developers, QA, Designers and Embedded Engineers and Integration Engineers. As a System Integration Engineer at Metrological you will be in daily contact with the technical counterparts at the operator and our core team in The Netherlands as they will be doing the actual implementation. You will be onsite on the customer premises (Istanbul Turkey) to support the integration activities.

3 reasons to apply to this job:

- This position will give you the possibility to work with an international company and a supporting team!
- You will work for one of the biggest telecom operators in Turkey and will be able to be onsite and learn to be part of Turkey's digital operator.
- If you will be part of our company the possibilities are virtually and globally unlimited.

### What are we looking for?

#### You must have:

- Technical education or equivalent professional level achieved due to experience
- Software Engineer with experience in hands-on software integrations as a software engineer for at least 1-2 years
- Fluent language skills in the Turkish and English, in writing and spoken language
- A helpful and trustful approach to our client and strong communication skills
- An unbeatable 'go for it' attitude and flexible and pro-active approach regarding your work ethics that does not stop at 5 o' clock sharp.
- A curiosity to learn new things and a creative and problem-solving mindset with a good mix to be a team player and work independently.

#### We like it if you can:

- Already work in SDK environment and are interested in developing apps on our Metrological platform. (<https://www.metrological.com/appdevelopers.html>)
- Are experienced with Photoshop and Illustrator, HTML 5 and CSS.
