

TV Application Developer - JavaScript

Do you see yourself building the latest Instagram, Xite or Wall Street Journal app that will reach 40 million households via television worldwide? Are you ready to join a disruptive, scalable company in the Netherlands?

In a nutshell:

You are responsible for the development of independent TV apps for our clients that will reach their worldwide app store. Comcast, KPN, Sky, VodafoneZiggo are a few of our clients to name. We offer a flexible, challenging and international environment where a lot of the newest technologies come together.

What will you do?

- Depending on the client, you will start with your own creativity or you will work on the client's specific wishes and deliver a ready to go app;
- You will work simultaneously on different apps. The development of our apps takes on an average level between 2 days and 3 months;
- The apps are developed in JavaScript and launched on our inhouse developed middleware framework for different settopboxes;
- You work closely together with your team-members, like our designer and tester. Also, you work together with our Embedded Team, Content-team, Project management and Platform Integration to ensure high quality.

What are we looking for?

- You are very customer focused and can adapt easily;
- You show initiative, are pro-active and creative;
- Curiosity. You have a growth mindset, which means you love to learn and
 - don't fear for any mistakes;
- You thrive in being involved in handling many parallel trajectories and
 - juggle many balls. You like those dynamics;
- Your priority is 'to get the job done'. We are looking for anyone that does
 - not have a 9-to-5 mentality and can deal with stressful situations and
 - changing priorities;
- Ability to influence the internal organization to change way-of-
 - working/processes to improve efficiency and thrive for customer
 - satisfaction;
- If it suits you, opportunities to travel abroad

Required experience and technical knowledge

- You have at least 3 years of experience with JavaScript (must);
- Experience with the development of apps is not a requirement, but you are
 - experienced with the entire software development process (must);
- You have experience developing in a resource constrained environment (eg
 - limited memory, GPU, CPU) (must). Especially legacy settopboxes may be very
 - constrained;
- Experience with Photoshop and Illustrator (advantage);
- Experience with NodeJS (advantage);
- Bachelor's degree in computer sciences or related technical area or proved
 - related technical experience;
- Fluent spoken and written English, understanding of the Dutch language is
 - desired but not required.

Why are we the best company to currently work?

Metrological is a hidden gem. As an App store platform, we make it possible to watch your favourite Apps like Netflix, Youtube, Amazon on the world's leading operators, like Comcast, KPN, Sky, VodafoneZiggo. This (inter)national company has presence in over 30 countries and with more than 300 apps on your set-top boxes and we are fast growing. We have offices in Rotterdam, Poland, USA and India. We are proud of our -around- 60 employees who love to be involved in tech, innovation and disrupting. And beyond that we are:

- Situated with our headquarters in the heart of Rotterdam and can best be described as a modern with an informal and professional atmosphere;
- Embracing the entrepreneurial and innovative spirit in the company that is keeping us busy and growing.
- Working in a very flexible way as it comes to homeworking and coming to the office is a natural way to meet and catch up with colleagues;
- Offering (growth) possibilities that are virtually unlimited. You will be challenged in a position in which you can relinquish your creativity and work on the product of the future. You work in an inspiring environment with the latest equipment, so you can get the best out of yourself;

How to apply?
